Education

Worcester Polytechnic Institute, Worcester, MA

Master of Science in Computer Science

Expected May 2027

GPA: 4.0/4.0

Bachelor of Science in Computer Science

May 2026

GPA: 3.97/4.0

Technical Skills

Languages & Tools: JavaScript, Java, TypeScript, C, C++, Python, SQL

Frameworks: React, Flask, React Native, Bootstrap, Nest.js, Next.js, Node.js

Tools & Platforms: AWS, PostgreSQL, MongoDB, Agile, Git, SQLite, Linux, Postman, MUI

Experience

Software Engineering Intern

June 2026 - Present

SAM LLC, Melville, NY

- Led the development of a full-stack onboarding portal that centralized employee training material, documentation, and executable scripts into a single platform, decreasing onboarding times by 31%
- Solely architected a full-stack application using API and database integration to modernize utility owner contact information into a digestible dashboard for use across all Northeast offices for 250 employees

Full Stack Developer Intern

Jul 2025 - Oct 2025

Xenara AI, Remote

- Launched a full-stack AI chat platform using React, NestJS, Node.js, and REST APIs
- Designed and implemented REST APIs, integrated backend with frontend, and conducted unit/integration testing
- Collaborated on a React + NestJS web app to help over 10 retail chains optimize portfolio management

Software Engineering Intern

Jun 2023 - April 2025

Northrop Grumman, Bethpage, NY

- Created a dynamic Excel tracking system to streamline purchasing, reducing manual entry and saving ~15 hours per week
- Developed an automated proposal generation software in Visual Basic for payment proposals worth up to five million dollars, saving an estimated 200–300 labor hours per proposal cycle

Personal Projects

Humanoid Robot - React, Node, Postgres, Express

Oct 2025

- Designed and implemented CI/CD pipelines and DevOps automation for a Humanoid Robotics platform to support 6 cross-functional teams, improving deployment speed and consistency across all subsystems
- Re-architected the project's backend stack from the ground up, implementing scalable APIs, modular microservices, and a full authentication system using JWT

DnD Encounter Planner - Flask, Postgres, AWS, Bootstrap

Jan 2025

- Created a web app for Dungeons & Dragons encounter planning, enabling user-specific data persistence and real-time difficulty calculations with a scalable database for user information

Facial Recognition Web App - React, TensorFlow, Vercel, CSS

Jun 2025

- Engineered and deployed an ML-powered app predicting age and gender from facial images with >90% accuracy

Medicinal Plant Database - SQLite

Jan 2026

- Implemented an offline-first, community-owned bilingual database for a community in Akyem Dwenase, Ghana
- Helped to prevent the local extinction of over 90 plants that community members rely on to survive

Student Assistant Web App - Flask, Postgres, AWS

Nov 2024

- Launched a secure web application on AWS cloud infrastructure using Flask, HTML, and CSS, serving 25+ active monthly users, and facilitated streamlined data management processes for student assistant roles
